

**YOUR PAPER'S TITLE STARTS HERE: PLEASE LEFT JUSTIFY; BOLD CAPITAL LETTERS; USE ARIAL 11**

A.A. Smith<sup>1</sup>, B.B Smith<sup>2</sup> and C.C. Smith<sup>3</sup>

<sup>1</sup> Full address of first author, including affiliation and email, underline corresponding author

<sup>2</sup> Full address of second author, including affiliation and email

<sup>3</sup> Full address of third author, including affiliation and email (use Arial 9 typeface for author's affiliation)

### **ABSTRACT**

This document explains and demonstrates how to prepare your camera-ready manuscript for publication. The best is to read these instructions and follow the outline of this text. The text area for your manuscript must be 155 mm wide and 232 mm high. Do not place any text outside this area. Top and bottom margins should be 35 and 30 mm, respectively; left- and right-hand margins should be set to 30 and 25 mm, respectively. Please select "symmetrical margins" in the Page Setup and use A4 (210 x 297 mm) paper. The title, authors' names and addresses and the abstract should be indented 1.5 cm from the left-hand margin of the text area and the text justified. Authors, abstract text and references should be written in typeface Arial 10 pt, while the rest of the text should be written in typeface Arial 10 pt. Use single spacing in all your paper. Abstract should be limited to 200 words. Leave two spaces above the abstract and between the title and the authors.

**Keywords:** List the keywords covered in your paper. These keywords will also be used by the publisher to produce a keyword index. Leave one space above the keywords

### **INTRODUCTION**

All manuscripts must be in English. When receiving the manuscript, we assume that the corresponding authors grant us the copyright to use the manuscript for the book or journal in question. Should authors use tables or figures from other Publications, they must ask the corresponding publishers to grant them the right to publish this material in their paper.

Use italic for emphasizing a word or phrase. Do not use boldface typing or capital letters except for section headings (cf. remarks on section headings, below). The paper should be 6 pages long. Please keep this in mind when designing your figures and tables etc.

Only the first page should include the Conference details as in this template. The text should be both left and right justified.

### **SECTION HEADINGS**

There are two levels of headings (please do not number them). Major headings are typed in bold in typeface Arial 10pt upper case. Minor headings are in typeface Arial 10pt bold. Major headings should have two lines space above and none below; minor headings should have one line space above and none below.

A line should be left above any heading.

### **Page Numbers**

Do not insert page numbers.

### **Tables**

Tables (refer with: Table 1, Table 2, ...) should be presented as part of the text, with one line space above and below. A descriptive title should be placed above each table. Units in tables should be given in square brackets [kW].

### **Figures**

Figures (refer with: Fig. 1, Fig. 2, ...) also should be presented as part of the text, with one line space above and below. The caption should be self-contained and placed below the figure. Generally, only original drawings or photographic reproductions are acceptable. Utmost care must be taken to insert the figures in correct alignment with the text. For best quality the pictures should have a resolution of 300 dpi (dots per inch).

Color figures are welcome for the electronic version of the proceedings. Generally, these figures will be reduced to black and white for the print version. The author should indicate on the checklist if he wishes to have them printed in full color, justifying the need for it.

### Equations

Equations (refer with: Eq. 1, Eq. 2, ...) should be indented 7.5 mm (0.2"). There should be one line of space above the equation and one line of space below it before the text continues. The equations have to be numbered sequentially, and the number put in parentheses at the right-hand edge of the text.

$$\dot{m}_a = \frac{\dot{W}}{(1+f)c_{pg}(T_3 - T_4) - c_{pa}(T_2 - T_1)} \quad (1)$$

where  $\dot{W}$  is the thermal power. Symbols should be described in the text

### Literature References

References are cited in the text by using numbers inside square brackets [1]. Two or more references at a time may be put in one set of brackets [3, 4]. The references are to be numbered in the order in which they are cited in the text and are to be listed at the end of the contribution under a heading References, see our example below. The reference text should be 7.5 mm inside the number.
